

Look what's new at Nouriche Nutrition Ltd!

sQWash®

Disinfectant
for
Livestock facilities

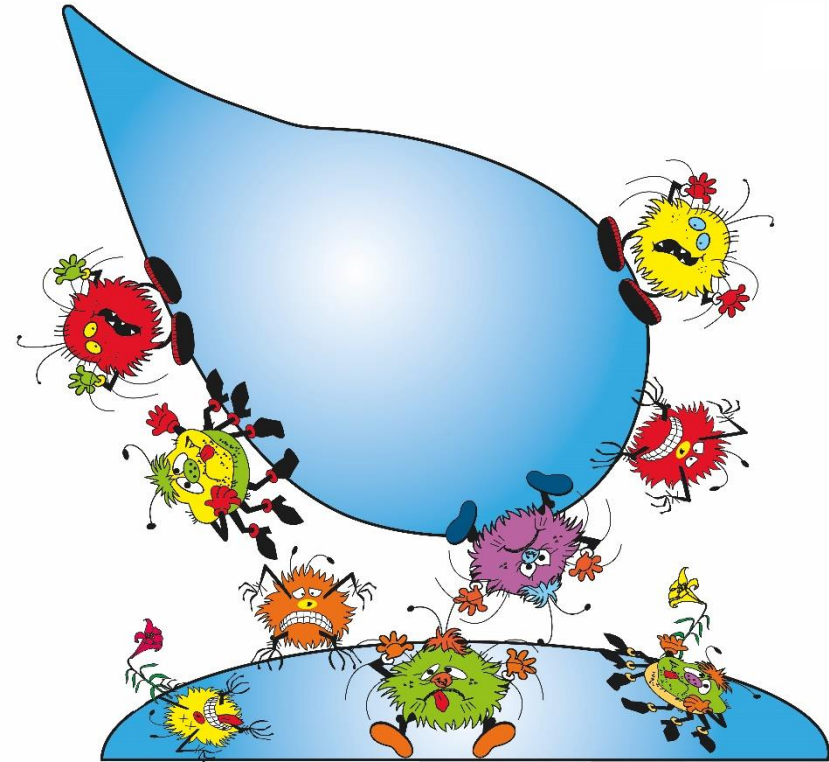

Lowers calf ranch
medication costs

sQWash®

Selectively and
Effectively Kills:

E. Coli
and
Salmonella

WARNING!

Do not give electrolytes to dehydrated calves!

with

PROTOCOL FOR FAILURE

1. Calf develops scours
2. Producer gives electrolytes
3. Calf becomes dehydrated
4. Producer gives electrolytes
5. Calf is unable to stand/suck
6. IV fluids administered
7. **Calf dies**

One benefit of I.V. fluid
is saving labor..

*... by having fewer calves
to take care of.*

Unique ORALIVE[®] Technology

is faster, easier,

less expensive, and

more effective than I.V. fluid,

and superior to all electrolytes.

PROTOCOL FOR SUCCESS

1. Calf develops scours and/or dehydration
2. Producer gives ORALIVE ORS
3. Calf rapidly re-hydrates
4. Scours might continue but stool volume is reduced
5. Producer continues to give ORALIVE ORS and milk replacer
6. Calf maintains hydration
7. Calf thrives
8. **I.V. fluids are unnecessary!**
