

Bovilis[®] Coronavirus

BOVILIS CORONAVIRUS

For the veterinarian and producer looking to provide calves protection against bovine coronavirus – a major contributor to scours, Bovilis Coronavirus is an innovative, modified-live, intranasal vaccine that can be given to calves at an early age to prevent the costly effects of enteric disease from taking their toll.

PRODUCT	Presentations	Dose	Route of Administration	Bovine coronavirus (BCV)
<i>Bovilis Coronavirus</i>	25x1 dose 10 dose 50 dose	2 mL	IN*	X

*Intranasal administration
