

ComfortEar®

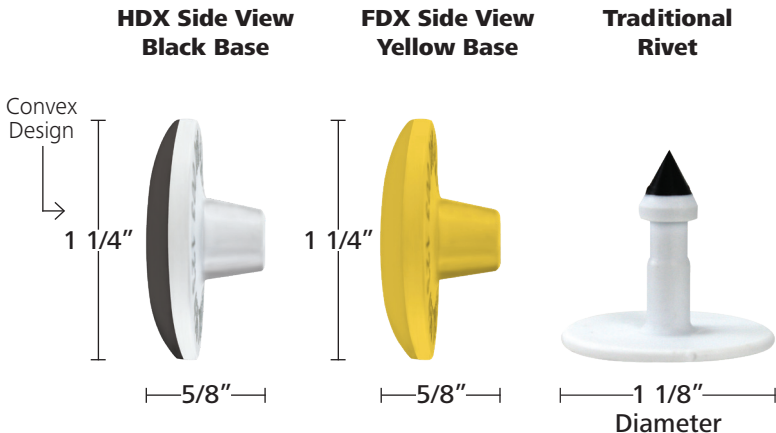

Radio Frequency Identification Tags (RFID)

Approved for USDA (840) Programs or manufacturer coded (988) depending on need.

2 Technologies Available

Full Duplex - FDX and Half Duplex - HDX

ComfortEar® offers you everything you look for in a state-of-the-art RFID ear tag.

Superior Readability

Industry-leading read distance, depending on reader quality and environmental factors.

ICAR Approved

Meets standards established by the International Committee for Animal Recording (ICAR), the worldwide organization of animal recording and productivity evaluation.

ISO Compliant

Conforms to standards established by the International Organization for Standardization (ISO) – the world's foremost developer of quality standards.

Convex Tamper Evident Design

Convex tag base designed for animal comfort and healing.

Tamper-evident design ensures security in livestock management programs.

Easy Application

Our Z2 No-Tear-Tagger® assures fast, easy and foolproof application while eliminating torn ears.

Technical Specifications

- Dimensions: Shown
- Weights: FDX-B - 6.8 grams, HDX - 7.2 grams, Rivet - 1.8 grams
- Compliance: ISO 11784, 11785
- Frequency: 134.2 kHz
- Technology: FDX-B / HDX
- Printing: Laser
- Read Range: Up to several feet – dependent on reader quality and environment
- Rivets included

Tagger: Apply with Z2 No-Tear-Tagger®

Animal: Good for all sized animals

ISO Compliant

Conforms to standards established by the International Organization for Standardization (ISO) – the world's foremost developer of quality standards.

Light Weight - Low Profile

Light weight works in animals of all ages and is ideal for young animals with tender ears. Slim design allows the tag to fit uniformly against the ear to prevent snagging.

Tamper Evident Design

Tamper-evident design ensures security in livestock management programs.

Easy Application

Our Z2 No-Tear-Tagger® assures fast, easy and foolproof application while eliminating torn ears.

How Radio Frequency Identification Works

Our livestock ID portfolio can greatly improve livestock tracking and identification processes to assist with traceability and disease control for the farming, ranching, feedlot and animal harvest industries. Unique ID systems for livestock management – including RFID – simplify full life cycle tracking of production animals and facilitate daily data collection for accurate, simplified recording. Unique ID systems make it easier to track animals from birth to harvest in compliance with food safety and traceability regulations.

1. Apply RFID tags to your animals.

2. Read RFID numbers to track individual animals using portable hand held readers or stationary antennas.

3. Use software to integrate data seamlessly to your livestock management system.

988 or 840?

988 EID tags are manufacturer coded RFID tags used for livestock management in large or small operations. 840 EID tags are approved for USDA programs. For more information on usage and options, call 800-433-3112 or contact your distributor.
