

BREATHE NEW LIFE INTO OLD EQUIPMENT

E.I. Medical Imaging has released the next generation of the original IBEX® PRO and LITE ultrasound platforms. Each system features improved image quality and probe shape, durability, warranty and new goggles options.

To upgrade, we take the main board, keyboard, screen and track ball [PRO] from your existing system, replace the case and battery, add new parts, and hardwire the all new high-definition L7HD or CLi4HD probe.

When complete, you have a new system with a 3-year warranty [including probe] for a fraction of the cost of purchasing a new system.

Plus, if you need a costly repair to an older, out-of-warranty system, it makes sense to upgrade now...updated technology with a new battery and warranty.

You will also be able to upgrade existing goggles to the i3 LED goggles. We are offering trade-in discounts for any working InSite®2 or when you upgrade the unit and headset at the same time.

IBEX PRO to PRO/r, LITE to SuperLite

The L7HD linear rectal probe provides high-resolution imaging of ovaries and early pregnancies and is ideal for dairy and equine reproduction as well as calf and foal lungs.

Features

- Hardwired to high-definition L7HD probe: improved resolution, ergonomics
- Maintains features of the original PRO or LITE
- DuraScan® case: water, dust and impact resistant
- 5.5 lb [2.5 kg]
- Frequency range: 5-8MHz
- Max depth: 12 cm
- Auto enhanced field of view [auto adjusts focus, frequency, gain and other parameters]
- Digital beam-former
- Gestational table
- Stores still frames and video loops
- Li-Ion smart batteries with 4+ hours of runtime [new]
- Multiple headset options available
- New 3-year warranty [warranty extension available]

IBEX PRO to IBEX PRO/c, LITE to SuperLite/c

The CLi4HD curved linear rectal probe operates at a low frequency range to offer improved penetration for deeper scanning. It is a great fit for later pregnancies, beef reproduction, and transabdominal imaging in small ruminants, camelids, and swine.

Features

- Hardwired to high-definition CLi4HD probe: improved resolution, ergonomics
- Maintains features of the original PRO or LITE
- DuraScan case: water, dust and impact resistant
- 5.5 lb [2.5 kg]
- Frequency range: 2.5-5MHz
- Max depth: 24 cm
- Wide field of view
- Auto enhanced field of view [auto adjusts focus, frequency, gain and other parameters]
- Digital beam-former
- Gestational table
- Stores still frames and video loops
- Li-Ion smart batteries with 4+ hours of runtime [new]
- Multiple headset options available
- New 3-year warranty [warranty extension available]

InSite2® to i3 LED Goggles

Small, lightweight and compatible with all IBEX veterinary ultrasound models as well as with Bantam and Easi Scan 1-4. LCD displays with LED backlight.

Features

All models are include:

- Detachable glare shields to block sunlight
- Versatile mounting options—ratcheted headband, head strap, hat clip

Both models are small and lightweight, and are compatible with IBEX EVO, PRO, and LITE as well as with Bantam and Easi Scan 1-4.

Custom designed optics

- LCD display with LED backlight
- Half the weight of InSite2
- Specially designed eye cups for inside and outdoor viewing
- Adjustable links, universal clip
- GoPro mount
- 3 year warranty [regular use]
