

# VETERINARIAN EXTERNSHIP

## About Us

Trans Ova Genetics provides industry-leading reproductive technologies and expertise to livestock breeders through a unique professional services team that works closely with clients to understand their breeding goals, and ultimately help clients advance and extend superior genetics.

Trans Ova Genetics understands the process that will help multiply a herd's genetic success. Reproductive technologies such as embryo transfer, in vitro fertilization (IVF), sexed semen, genetic preservation and cloning are considered the reproductive "tools" available for breeders looking to achieve specific breeding and reproductive goals.

## Our Program

Trans Ova Genetics is proud to offer an externship program for fourth year veterinarian students from AVMA accredited schools. Students work along side the veterinary staff learning about the many tools Trans Ova Genetics has available in it's advanced reproductive toolbox and general herd health care.

### Duration

Students will spend 2 - 4 weeks with Trans Ova's veterinary teams. We offer externships year around except during the summer.

### On Site Training

Through Trans Ova University, we provide on site training to equip our veterinarians with all the skills of our toolbox in order to be successful.

### Network Opportunities

Not only do students learn valuable skills for their future career, they also meet the best in the industry and collaborate along side them.

### Our Team

Trans Ova's skilled team members come from all over the world to bring you years of experience that provide you with industry-leading technology and standards you can count on.
