

Monovet<sup>®</sup> 90  
(monensin)

# Your New Choice For Monensin

Huvepharma, the global leader in monensin manufacturing, is proud to bring Monovet<sup>®</sup> 90 to your operation and to the millions of head of cattle using our product in every form of feed across America.

We know that new choices bring you new possibilities for keeping both your herd and your bottom line as healthy as possible. And the more you know about Monovet 90, the more you're able to make the right choice for your operation.

## Choose something new:

Monovet 90 is fully equivalent to Rumensin® as a 90.7 g/lb. type A monensin feed article for cattle and goats.

## Choose manufacturing excellence:

Huvepharma ferments our own monensin API at our state-of-the-art facilities in Europe and blends type A Monovet 90 at our plant in St. Louis, Missouri.

## Choose a product that was GLP tested for efficacy:

Approved by the FDA in 2019, Monovet 90 is the only Monensin that has been GLP tested for efficacy on the market today; the highest standard of testing by the FDA.

GLP is a set of standards to assure the highest quality and integrity of non-clinical laboratory studies intended to support research for products regulated by the FDA, including some animal feed additives.

All studies, including the clinical end-point feed efficiency, comparative dissolution and tissue residue studies, supporting FDA approval of Huvepharma's Monovet 90 were conducted according to GLP quality standards.

## Choose outstanding service and support:

Monovet 90 represents the first competitive option to Rumensin in the market, which means improved value for all users of monensin.

Monovet 90 is supported by Huvepharma's dedicated team of technical experts and sales professionals.

Feed Assay testing is available from Huvepharma's laboratory as part of our St. Louis manufacturing facility.

## About Huvepharma

One of the fastest growing animal health companies in the world<sup>1</sup>, Huvepharma has over 50 years of experience in creating and manufacturing top-quality animal health and nutrition products. Today, with Monovet 90, we're putting that heritage to work, bringing you a new choice in monensin. A new choice in unlocking the potential of your operation.
