

Nasalgen³

The color of longer-lasting IBR protection.

The unrivaled 3-way intranasal BRD vaccine.

NASALGEN³ is a three-way intranasal vaccine that protects beef and dairy cattle against viruses commonly associated with pneumonia caused by:

- Bovine respiratory syncytial virus (BRSV)
- Infectious bovine rhinotracheitis (IBR)
- Parainfluenza 3 (PI₃)

Easy to administer.

- Single 2 mL dose in one nostril

Unique blue shadow for confident administration.

- Avoid missing calves or double-dosing

No injection site reactions.

- Helps your operation meet Beef Quality Assurance standards

Duration of Immunity (DOI).

- 11 weeks: BRSV
- Six and a half months: IBR
- Three months: PI₃

Mounts strong, early response for powerful, long-lasting protection.

- Mimics natural exposure to the most common causes of pneumonia for an effective immune response

Protection no matter the temperature.

- Designed with an IBR that is not temperature-sensitive, ensuring the vaccine will replicate and protect in any situation¹
- Proven safe in pregnant cows and in calves nursing pregnant cows, building a strong foundation for disease protection
