NOTE: Careful weight estimates are essential for proper performance
of this product. Prepare solutions as needed. However, excess solu-
tions may be stored in clean closed containers up to 90 days without
loss of anthelmintic activity.

Cattle and sheep maintained under conditions of constant helminth
exposure may require retreatment within 2 to 4 weeks after the first
treatment.

WARNING: Do not administer to cattle within 48 hours of slaughter
for food. Do not administer to sheep within 72 hours of slaughter for
food. To prevent residues in milk, do not administer to dairy animals of
breeding age.

CAUTION: Muzzle foam may be observed. However, this reaction will
disappear within a few hours. If this condition persists, a veterinarian
should be consulted. Follow recommended dosage carefully. Consult
veterinarian before using in severely debilitated animals.

Consult your veterinarian for assistance in the diagnosis, treatment
and control of parasitism.

Store between 15° and 30°C (59° and 86°F). WARNING: Keep out of
reach of children. For Animal Use Only
