

NEW! Shoulder Guards now available in PURPLE

If you palpate cows, you need this shoulder guard. I can focus on the cow without having to worry about getting my shirt dirty. As a short gal with short arms, it's an issue. As a vet student, I love being able to go to the farm for a herd check and then zip back to class without having to worry about an entire wardrobe change. The fit is nice and it keeps me clean and dry. Easy to hose off in the parlor when you're done. Money well-spent!

-Elli

Been a veterinarian for 5 years, I do a lot of pregging at 2 cattle sale barns. These are essential to my pack. Makes a messy job that much cleaner. I believe I have ordered 10 throughout the years, seems very durable product.

-Will

This product works great for palpating. As a medium build man, the size regular works well; the velcro strap is a great feature.

-Thomas

I am a large animal veterinarian and this is a must have! It is very durable and I love that it comes in a size small which works perfect for those with a smaller build.

-Emily
