

WIRELESS ULTRASOUNDS

move more
do more
wireless

Easi-Scan:Go™

Easi-Scan:Go is our most rugged scanner yet. This wireless ultrasound strengthens the relationship between vets and farmers while ensuring better productivity.

WATERPROOF
Sealed buttons with no connectors

FETAL AGING
Use calipers to measure embryo size for automatic aging calculations

LIGHTWEIGHT
Less than 2 pounds

SAVE VIDEOS & PHOTOS
Directly on any smart device

LITHIUM-ION BATTERY
Runs up to 5 hours

LINEAR PROBE
128 elements, receiving on 32 channels, 26 frames per second

CONNECTED
Up to 3 devices

Easi-Scan:Go™ curve™

Sound-Link, IMV's unique wireless data transmission platform for real time imaging allows image display without any image lag. With Smart-Beam technology we have developed an ultrasound scanner that requires minimal power, with standard Wi-Fi devices used as a primary viewing.

CURVED LINEAR PROBE
128 elements, receiving on 32 channels, 26 frames per second

BUG-OLED:Go™

ADJUSTABLE
To fit your head
perfectly

WIRELESS
Increase efficiency
and mobility

OLED TECHNOLOGY
Providing clear images
in both bright and
dark environments

This first-ever wireless ultrasound goggle provides you complete mobility, increasing your efficiency at every herd check. Just like its predecessor, BUG-OLED:Go allows you to see the ultrasound image in front of your eyes, with the same crisp OLED technology, but without the wires.
